

CORPORATE PROFILE

Vision: Building an ethically responsible society.

We pursue our vision through thought leadership and ethics-related offerings, including training, advisory services, assessments, audit services, products, and Supporter opportunities.

We work with the public and private sectors, as well as professional associations.

Thought leadership

We conduct original research to understand how organisations govern and manage their ethical standards. Our findings are openly disseminated to foster ethical consciousness and stimulate debate on ethical matters. Our thought leadership activities include:

- contributing to policy formulation in respect of organisational ethics
- participating regularly in public debates
- presenting at public events and academic conferences
- contributing to a variety of publications

We conduct and publish research related to organisational ethics, corruption prevention, and professional ethics.
